

## HiQ behind Wärtsilä's global intranet

In close collaboration with Wärtsilä, HiQ has developed the concept for their new global intranet. 18,000 employees in 70 countries benefit from the improvements.

"I'm happy that we have delivered yet another solution that simplifies people's everyday lives," says Jukka Rautio, Managing Director at HiQ Finland.

Wärtsilä is a global leader in advanced technologies and complete lifecycle solutions for the marine and energy markets. The new social, mobile intranet is providing targeted information for users based on individual needs and intuitive search experience with well-planned and scalable information architecture.

HiQ has developed a new concept as well as handled the technical implementation and migration from SharePoint 2010 server to Office 365. The new intranet is an important step in the process of simplifying the everyday work for Wärtsilä's 18,000 employees worldwide.

"The co-operation with HiQ worked well – we worked as one team. I'm especially happy that a global project was completed on schedule. HiQ's wide knowledge about collaboration and technology helped us to succeed from the concept to the global roll out," says Amos Ahola, Senior Manager, Communication and Branding, Wärtsilä.

A well-planned information architecture was the foundation of the new intranet concept and solution. Microsoft best practices and default functionalities were applied as much as possible to ensure a scalable and sustainable solution with easy maintenance and flexible continuous development possibilities.

"For Wärtsilä its key to have a well-functioning intranet that is easy to maintain, is scalable and support the individual user's needs. I'm happy that we have delivered yet another solution that simplifies people's everyday lives," says Jukka Rautio, Managing Director at HiQ Finland.
